It played a significant role in the geopolitical environment of medieval period in between India and China with many independent states at war with each other. Thang-Ta (The art of sword and the spear) thus became an expressive art form which however retained its fighting character at the secret home schools of individual teachers or Gurus, after being prohibited during the colonial period (1891-1947). It survived during the period of Manipur's integration with the Indian Union in 1949, where the art-form was shown in various festivals and performance platforms abroad since 1976.
